Book Review

Book Review

RILANCIO DELLA COLTURA DEL PERO produced by the CENTRO OPERATIVO ORTOFRUTTI-COLO of Ferrara (Region's Romangna and Societa Orticola Italiana both of Bologna) is a collection of 21 papers reporting recent work on pear culture. The publication was coordinated by Dr. Silviero Sansavini and covers many aspects of pear culture including pruning, training, cultivars, disease problems and much more. It is written in Italian but contains brief summaries of most papers in English and is well illustrated with many colored pictures. This is an excellent reference providing an up to date treatise on many aspects of pear culture.

MONOGRAFIA DI CULTIVAR DI PERO by A. Nicotra, D. Cobiainchi, W. Faedi, and P. Munzo published by the Ministero dell'Agricoltura e delle Foreste in 1979. This reference contains beautiful colored pictures of 66 pear cultivars as well as a written description of each. The publication contains 91 pages and is written in Italian.
