A. N. Wilcox, Fruit Breeder, Dies

A. N. Wilcox, director of the fruit breeding work at the University Fruit Breeding Farm of the University of Minnesota, at Excelsior since 1953, died February 26, 1963, at the age of 64.

Born in Waterloo, Wisconsin in 1898, Dr. Wilcox did his undergraduate work at the University of Wisconsin, and took his graduate degree at the University of Minnesota. He was on the staff at Minnesota for 40 years, until his death. He was the first to in-breed strawberries to develop improved varieties; and he introduced, through the University, the Earlimore and Trumpeter strawberries, and the Moongold and Sungold apricots.
