**Origin of American Pomological Society**

The following is a quotation by Dr. Hexamer, from the American Pomological Society Proceedings for 1897: "The National Pomological Convention met at Buffalo, N. Y., in September, 1848, and under the name 'North American Pomological Convention' met at Syracuse, N.Y., in September, 1849. The 'American Congress of Fruit Growers' met in the city of New York in October, 1848, and again in the same city in October, 1849. At the sessions of both Societies

in 1849 committees were appointed to arrange for a union of the two organizations and this resulted in the organization of the American Pomological Congress in 1850 at Cincinnati. The next meeting of the Society (1852) was held in Philadelphia and there the name was changed to the American Pomological Society. At that meeting Marshall P. Wilder was elected President and he retained that position until his death."

—George M. Kessler
